WATeR Works

September 2011

YOUR HELP IS NEEDED

The WATeR nominating committee is searching for candidates to fill open positions for the WATeR Board. Nine board members meet monthly to oversee our efforts to protect and improve the environment in the Tellico Reservoir Watershed. New board members will be elected at the November 17 annual meeting and start on the board in January, 2012.

The WATeR board is responsible for preserving the long term vision, and providing direction and funding for projects. Specific job descriptions are available upon request.

Prior newsletters have kept you informed of the specific projects and accomplishments of our organization in the areas of watershed cleanup, the East Lakeshore trails, Heron Island, water quality efforts and environmental education. These accomplishments are the result of hard work and dedication of our members working through committees. These committees can also use more help and want your input.

If you are a motivated visionary with an interest in joining the Board or a committee or have questions, please contact Marjorie Waldrop at 458-0506 or MKWaldrop@aol.com right away.
